**Drake Controls Appointed Exclusive Woodward Distributor
& Recognized Turbine Retrofitter**

Woodward Industrial Controls appointed Drake Controls LLC in October of 2002 as the exclusive distribution partner for our line of industry standard control solutions, including governors, actuators, valves and electronic controls in the state of Texas, Oklahoma, Kansas and New Mexico. In addition to Woodward sales and service Drake Controls is also a Woodward "Recognized Turbine Retrofitter". The "RTR" title certifies that Drake has met Woodward's requirements and completed necessary training to supply turbine control upgrades to Woodward customers internationally.

Based in Houston, Drake Controls is now distributing, installing and servicing Woodward products across the above territory.

Drake Controls offers experienced, factory certified repair technicians and engineers to service your existing Woodward controls, using only Woodward OEM parts and repair procedures to insure the integrity of your equipment. They also have an experienced retrofit and upgrade team on staff to provide a complete control solution that will maximize the capability and reliability of your equipment.

Established in 1870, Woodward has become the world's largest independent manufacturer of comprehensive control systems solutions for engines, turbines and power equipment. Our success is based on providing the industry with a full range of control systems solutions that have been optimized for your steam turbine, gas turbine, and gas and diesel engine equipment. Our mechanical and hydraulic control solutions are considered the industry standard in marine, power generation and process industry applications, and our powerful digital controls and power management solutions set the benchmark for reliability, ease of use and network communications capabilities.

Woodward and Drake Controls look forward to working with you to keep your equipment performing to optimum levels. Please feel free to address your needs and concerns directly to Drake Controls at:
